Visit the site in the screenshot below: There are multiple types of database management systems available. Among them, Microsoft Access remains a popular choice, due to its user-friendly interface. On the other hand, we have FoxPro, which wasn't only a DBMS, but a programming language as well. Later, it became Visual FoxPro, until it was finally discontinued by Microsoft in 2010. Even so, there are many who still use FoxPro and consider it a powerful platform. If you share that opinion and are fond of the old programming tool, then you may have found yourself in a situation where you needed to migrate information from MS Access to FoxPro. If that's the case, then you might be interested in MS Access Tables To FoxPro Converter Software. The program has a simplistic interface, as the converting process is controlled from a single window. Simply add the MDB or ACCDB files that you wish to migrate and enter the password (if it's required). Afterwards, click the Start Converting button and keep an eye on the progress bar at the bottom of the window. Tables To Excel works as both a tool to convert Access Tables to Excel and as a tool to import and export Access tables into Excel. One of its best features is the Preview Function. The program provides you with a Quick Guide, where you can make some changes to your MS Access database. However, this guide is difficult to follow. This program has two great possibilities: - Tables To Excel can create a.XLS file to include the Access tables you want to convert. - You can also import tables in a Microsoft Office compatible file. Unfortunately, Tables To Excel doesn't integrate well with Access. You need to work with it independently. You can't simply close MS Access and start working in Tables To Excel. This is a serious minus for this product. Tables To Excel is a very efficient program that offers an Excel.XLS file with the tables you want from MS Access. It supports preview of imported tables in a Microsoft Word compatible format. Although the program has the.XLS file, you can't execute it. You have to do it manually. You have to open the.XLS file and click on the "Run" button to open the imported tables in Excel. A conversion is not as easy as it could be. It's harder to use than the Windows Access Tables to Excel, but it's
